The Interplak® Water Jet enhances oral hygiene and significantly contributes to healthy gums when used as part of a responsible oral health management program. It is particularly effective at cleaning around orthodontic appliances, fixed and removable bridge work, implants and splints, and it provides valuable gum massage with every use.

Remember: Oral irrigation is a supplement to, not a substitute for, your oral hygiene routine. Ask your dental health care provider to advise you on how the Water Jet can most effectively meet your specific oral needs.

### Instructions For Use:

- **Remove the water reservoir (2) and fill with lukewarm water. Reinstall the reservoir firmly onto the unit (1).** Prior to initial use, the unit should be rinsed by letting a full reservoir of water pass through it. If the unit is to be used with a mouthwash solution, it should be rinsed with clean water after each use to remove any traces of mouthwash. If the unit has not been used for a long period of time, for reasons of hygiene it is advisable to follow the directions for initial use, letting a full reservoir of water pass through.
- To remove trapped air upon initial operation, turn the rotary flow control all the way to the right and then to the left, three times.
- **Prior to filling the water reservoir, make sure water tip is firmly placed on and in the stand.** The Water Jet is supplied with 5 attachments.

#### Standard Tip (2pcs):
- Removes trapped particles from between teeth.

#### Subgingival Tip (1pc):
- Uses a soft rubber tip to massage the gums and safely deliver solution into the gingival pockets below the gumline.

#### Brush Head Tip (1pc):
- Loosens debris and larger food particles before flushing them away—ideal for all dental work, including fixed and removable appliances.

#### Tongue Cleaner (1pc):
- Place the tongue cleaner at farthest end of tongue and move forward to cover entire tongue. After switching on (6) the unit, the rotary flow control (7) can be used to regulate the water pressure. You should begin with the lowest setting so that your gums can become accustomed to the water jet.

1. **Press the water-stop button (4) and, after switching on the unit, place the tip in your mouth and lean over the sink. When you release the water-stop button, the cleaning and massage process will start.**
2. The direction of the water jet in your mouth can be controlled by tilting the tip to the desired position on the handle. Keep your mouth lightly open and hold your elbow at mouth level so that the water can run back into the sink. Direct the water jet towards your teeth, especially between your teeth, in order to rinse away disclosing food. This also massages your gums. Do not point the water jet directly towards your gums: point between your teeth to prevent damage to delicate gum areas.

### Cleaning and care:

- If, in the course of use, the valve (8) on the water tank begins to leak, this can be taken care of by closing the value. To do this, push out the valve body using the nozzle tip and replace the valve.

2 Year Limited Warranty

Conair warrants to the owner of this Interplak® Dental Water Jet that it is free from defects in materials and workmanship for a period of two years from the original date of consumer purchase. This warranty does not cover damage to the product as a result of misuse or accident and does not apply to attachments. IN NO EVENT SHALL CONAIR BE LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES. If the product becomes defective in warranty (2 years from date shown on receipt) or out of warranty, call 1-800-472-7606. When returning your Interplak® Dental Water Jet in out of warranty, add $7.50 for postage and handling. This warranty gives you specific legal rights, and you may also have other rights which vary from province to province.

IMPORTANT SAFEGUARDS
READ ALL INSTRUCTIONS BEFORE USING

• DO NOT use the unit while bathing.
• ALWAYS unplug the product immediately after using.
• DO NOT place or store the unit where it can fall or be pulled into a tub, sink, or toilet.
• DO NOT reach for a unit that has fallen into water; unplug immediately. Do not reach into the water under any circumstances.
• Have the unit checked by an Authorized Service Centre after it has been in water.
• The unit is designed for use in a 120 volt AC 60 Hz outlet. Never plug the unit into an outlet.
• DO NOT submerge the unit in water or any other liquid.
• Never use the unit if it has a damaged plug, if it is not working properly, if it has been dropped or damaged, or if it has been immersed in water. Refer to an Authorized Service Centre for repair.
• DO NOT excessively bend or pull the cord. Unplug the cord by grasping the plug – NOT THE CORD.
• Keep the cord away from heated surfaces.
• Close supervision is necessary when this product is used by, on, or near children or disabled persons.
• Use this product only for its intended use as described in this manual. Only use attachments recommended by the manufacturer.
• Never use while drowsy.
• WARNING: Changes or modifications to this unit not expressly approved by Conair could void the user’s authority to operate the equipment and void limited warranty. Servicing should always be referred to an Authorized Service Centre.

DANGER
To reduce the risk of electrocution:
• If you have had oral or periodontal surgery in the previous twelve months, contact your dentist prior to use.
• When you start any new oral hygiene program, your gums may initially bleed slightly. Contact your dentist if excessive bleeding occurs or if bleeding continues after two weeks of use.
• Be sure that only the water jet nozzle touches your teeth and gums. Damage to teeth and gums may occur if any other part of the unit touches them.
• This product is designed for oral cleaning only. DO NOT use the unit for any other purpose.
• Use only with children or disabled persons.
• Keep this and all other instructions in a safe place for use by the next owner.

SAVE THESE INSTRUCTIONS

WARNING
To reduce the risk of burn, electrocution, fire, or injury:
• This appliance has a polarized plug (one blade is wider than the other). As a safety feature, this plug will fit into a polarized outlet only one way. If the plug does not fit into the outlet, reverse the plug. If it still does not fit, contact a qualified electrician. Do not attempt to defeat this safety feature.

MEDICAL WARNING For your safety
• If you have had oral or periodontal surgery in the previous twelve months, contact your dentist prior to use.

OPERATING INSTRUCTIONS
• This appliance has a polarized plug (one blade is wider than the other). As a safety feature, this plug will fit into a polarized outlet only one way. If the plug does not fit into the outlet, reverse the plug. If it still does not fit, contact a qualified electrician. Do not attempt to defeat this safety feature.

IMPORTANT SAFEGUARDS
READ ALL INSTRUCTIONS BEFORE USING

• Do not use the appliance in the shower or in the presence of excessive moisture. Always unplug when not in use and before cleaning.

DANGER
To reduce the risk of electrocution:
• Do not use or allow children to play with the equipment when it is plugged in or plugged into an outlet.
• Do not use in the presence of excessive moisture in the area. Always unplug when not in use and before cleaning.

WARNING
To reduce the risk of burns, electrocution, fire, or injury:
• This appliance has a polarized plug (one blade is wider than the other) as a safety feature. This plug will fit into the outlet only one way. If the plug does not fit, reverse the plug and try again. If it still does not fit, contact a qualified electrician. Do not attempt to defeat this safety feature.
• Be sure to keep the cord away from heated surfaces.
• Never use while drowsy.

MEDICAL WARNING
For your safety

• If you have had oral or periodontal surgery in the previous twelve months, contact your dentist prior to use.
• When you start any new oral hygiene program, your gums may initially bleed slightly. Contact your dentist if excessive bleeding occurs or if bleeding continues after two weeks of use.
• Be sure that only the water jet nozzle touches your teeth and gums. Damage to teeth and gums may occur if any other part of the unit touches them.

WARNING
Changes or modifications to this unit not expressly approved by Conair could void the user’s authority to operate the equipment and void limited warranty. Servicing should always be referred to an Authorized Service Centre.
