

WHY DO YOU NEED A GFCI? Electricity and water don't mix. If your hair dryer falls into water while it's plugged in, the electric shock can kill you...**even if the switch is "off."** A regular fuse or circuit breaker won't protect you under these circumstances. A GFCI offers you far greater protection.

A GFCI can save your life! Compared to that, the price is small! Don't wait...install one now!

*GFCI is a sensitive device which reacts immediately to a small electric current leak by stopping the electricity flow.

ADDITIONAL INFORMATION

FOR DUAL-VOLTAGE DRYERS

For use in the North America, the voltage selector switch should be placed in the 125 position. For use in several countries overseas, the voltage selector may need to be placed in the 250 position. Confirm the voltage available at each overseas location before using the appliance. For connection to a 250 volt supply, use an attachment plug adapter of the proper configuration for the power supply receptacle.

For 125 Volt Operation

Flick the dual voltage switch to the 125 position. In this position, the dryer operates in all available heat and speed settings.

- 4. **Never operate this appliance if it has a damaged cord or plug, if it is not working properly, if it has been dropped, damaged, or dropped into water. Return the appliance to a Conair service centre for examination and repair.**
- 5. Keep the cord away from heated surfaces. Do not pull, twist, or wrap line cord around dryer, even during storage.
- 6. Never block the air openings of the appliance or place it on a soft surface, such as a bed or couch, where the air openings may be blocked. Keep the air openings free of lint, hair, and the like.
- 7. Never use while sleeping.
- 8. Never drop or insert any object into any opening or hose.
- 9. Do not use outdoors or operate where aerosol (spray) products are being used or where oxygen is being administered.
- 10. Do not use an extension cord to operate dryer.
- 11. Do not direct hot air toward eyes or other heat-sensitive areas.
- 12. Do not place appliance on any surface while it is operating.
- 13. While using the appliance, keep your hair out of it. Keep your hair away from the air inlets.
- 14. Do not use with voltage converter.

For a dual voltage hair dryer:

- 15. Be sure dual voltage selector is in correct voltage position before operating. Before plugging in, read the information about

For 250 Volt Operation

First put the HI-LO (I-II) switch into LO (I). Flick the dual voltage switch to the 250 position. At 250 while set at LO (I), the dryer operates only at high speed with high heat. **Do not attempt to operate the HI-LO (I-II) switch or change to 125 when operating on 220-250V. The switches must be set and remain in the LO (I-II) and 250 positions.** A plug adapter may be necessary in certain countries.

Blocked or clogged air intake will cause the dryer to overheat. If overheating occurs, an automatic safety device will shut the dryer or the heat off to prevent damage or personal injury. If the unit or the heat cycles off, unplug the cord and allow the dryer to cool for 10 to 15 minutes before restarting. Make sure the air vents are clean.

USER MAINTENANCE

Your dryer is virtually maintenance-free. No lubrication is needed. For proper operating performance, the dryer must be kept clean. When cleaning is needed, unplug the cord, and clean dust and lint from air intake openings with a small brush or the brush attachment of a vacuum cleaner. The outer surface of the dryer should be wiped clean with a damp cloth only.

Blocked or clogged air intake vents will cause the dryer to overheat. If overheating occurs, an automatic safety device will shut the dryer or the heat off to prevent damage or personal injury. If the unit or the heat cycles off, unplug the cord and allow the dryer to cool for

dual voltage contained in the instruction section of this manual.

- 16. This appliance was set at the factory to operate at 125 volts. Refer to Additional Information section of this manual for conversion to 250 volt operation.

SAVE THESE INSTRUCTIONS OPERATING INSTRUCTIONS

This appliance is intended for household use only. Use on Alternating Current (60 hertz) only. Standard Dryers are designed to operate at 110 to 125 volts A.C.

This appliance has a polarized plug (one blade is wider than the other). As a safety feature, this plug will fit in a polarized outlet only one way. If the plug does not fit fully in the outlet, reverse the plug. If it still does not fit, contact a qualified electrician. Do not attempt to defeat this safety feature.

IMPORTANT

1600 WATT OPERATING GUIDE

Use of this dryer on the same circuit or fuse with other electrical products or appliances may trip a 15 amp circuit breaker or blow a 15 amp fuse.

NEVER replace fuse with one rated higher than the capacity of the circuit. Doing so could result in an electrical fire.

10 to 15 minutes before restarting. Make sure the air vents are clean.

CAUTION

NEVER allow the power supply cord to be pulled, twisted, or severely bent. Never wrap the cord tightly around the dryer. Damage will occur at the high flex point of entry into the dryer, causing it to rupture and short. Inspect the cord frequently for damage. **Stop use immediately if damage is visible or unit stops or operates intermittently.**

If the cord or dryer is damaged or does not operate properly, return it for repair to an authorized Conair service representative only. No repairs should be attempted by the consumer.

STORAGE - Important

When not in use, your dryer should be disconnected and stored in a safe, dry location, out of reach of children. Do not wrap line cord around dryer. Allow the cord to hang or lie loose and straight at the point of entry into the dryer.

LIMITED ONE YEAR WARRANTY

Conair will repair or replace, at our option, your appliance free of charge for 12 months from the date of purchase if the appliance is defective in workmanship or materials.

To obtain service under this warranty, return the defective product to the service centre listed below together with your sales slip and \$7.50 for postage and handling. In the absence of a receipt, the warranty period shall be 12 months from the date of manufacture.

ANY IMPLIED WARRANTIES, OBLIGATIONS, OR LIABILITIES, INCLUDING BUT NOT LIMITED TO THE IMPLIED WARRANTY OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, SHALL BE LIMITED IN DURATION TO THE 12 MONTH DURATION OF THIS WARRANTY.

IN NO EVENT SHALL CONAIR BE LIABLE FOR ANY SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES FOR BREACH OF THIS OR ANY OTHER WARRANTY, EXPRESS OR IMPLIED, WHATSOEVER.

This warranty gives you specific legal rights, and you may also have other rights which vary from province to province.

MAKING WAVES

Tousled, natural-looking waves are easily created by grasping hair at the roots and scrunching between fingertips while drying.

The Conair 1600 watt folding dryer – the ultimate travel companion. Equipped with dual voltage for world-wide travel.

FEATURES

1. **Power**
1600 watts of drying power.
2. **2 Speeds/2 Temperatures**
for styling versatility.
3. **Folding Handle**
for easy storage.
4. **Dual Voltage**
for world-wide travel.

STYLING GUIDE

1. Towel blot hair to remove excess moisture. Section hair. Using the dryer along with your styling brush, direct hot air through a section of hair at a time. Move dryer steadily across each section so that the hot air passes through hair. Direct air flow at hair, not scalp.
2. Keep dryer's air intake vents unobstructed and free from hair while drying.
3. To avoid over drying, do not concentrate-heat on any one section for any length of time. Keep dryer moving as you style.
4. For quick touch ups between shampoos, dampen hair with a mist of water before styling with the dryer.
5. When using your dryer to create curls and waves, dry hair almost completely on a warmer temperature setting, then finish styling with Cool Shot feature to close hair shaft and lock in style.

BODY & VOLUME

To create extra volume, turn head upside down while drying. Position the airflow toward the roots for maximum lift. When hair is dry, toss head back and brush hair into place.

STRAIGHTENING

Work with hair in sections when creating a super straight look. Using a large round brush (approximately 2" [5 cm] diameter), hold hair taut in each section and bend ends slightly under as you dry.
